

THE
GLOBAL INFORMATION NETWORK™
SOVEREIGNTY WEALTH FREEDOM®

Here's what others said about the benefits of becoming a Level 1 member of the *Global Information Network!*

“ Since joining GIN, I have learned more in the last three months than in my 16 years of education in schools and college. Level one has changed the way I think about myself and the universe. It has been awakening.”

- **Norm L.**

“ Becoming a Level one GIN Member from an affiliate is like looking through a window at the beach versus standing on the sand and experiencing it. The information is life changing. I am most definitely not the person I was before my membership. I'm learning how my way of thinking and feeling is directly impacting every aspect of my life, but that I have the choice at any moment to change them is empowering and motivating. The speakers are phenomenal, genuine, and sincere. Their knowledge that they generously share is inspiring and practical. I cannot express enough gratitude and appreciated for all that I've listened to and met. What I'm discovering is not only transforming me, but also those around me. They are learning and growing as I learn and grow. I'm gaining confidence to do more than I had expected of myself and be more than I expected of myself. These qualities are getting noticed in my community. Anyone on the fence wondering if it is worth the investment, I can only say for me that it is so worth it and much more.”

- **Heidi G.**

“ My level one training has helped me more than anything in life ever has or I could have ever imagined. I listened to the Your Wish is Your Command CD's 8 times before even joining GIN and that's what started my transformation. Right now I have finished with the level one training, and I'm concentrating on improving my health and going Platinum with GIN's affiliate program in December for the 2% bonus. I KNOW I will be going far in life after completing the level one training alone, and there is no limit to my potential and success in life. Thanks GIN, I owe my new life to your training alone, besides my own decision to accept and learn the training. Thanks a Million, and see you at the top.”

- **Brian B.**

“ The training was excellent and very informative. It is clear that GIN is committed to making the universe a better place to live, and remove the suppression keeping people from pursuing their dreams. This is for anyone who is functioning in a state of fear and wants to get to the truth of what is happening globally.”

- **G.S.**

“ Thank you for creating this organization. It is truly the answer to a prayer I have held for a long time. To use one of the terms I have come to know, I was consciously incompetent when it came to wealth. I knew that I didn't have the knowledge I needed to manifest the kind of wealth I wanted in my life. From the very first audio in Your Wish is Your Command, I realized I had found what I was looking for. As I listened to all the YWIYC audio files and then the training sessions in Zurich and Germany, it felt as if a whole new world was unfolding before me. Each new Level one training audio added more depth and ignited in me an aspiration to learn even more. Once I finished all the sessions, I realized how much I had learned and how it had changed me for the better. I also realized that even though I had learned so much, I also missed quite a bit as well. So, I listened to them again. As I now prepare to move onto Level 2, I am eager to see what more there is to learn, but I will continue to refer back to the fundamentals of the Level 1 training for years to come.”

- **Joy A.**

“ The Level one training I have received from GIN has been life changing! Depression is something I have fought with for many years, not anymore. I have learned how to eliminate negative thoughts and addictions for good, enjoy what I have and be very thankful also. I am now pursuing my dreams and have just started a business which I feel really good about and am more excited about life than I ever have been. Now life to me is an adventure every day, and I create it. GIN is an amazing well organized program loaded with great information, opportunity, and networking that ALL people could benefit from. I would recommend it to anyone, especially if they wanted to stop talking about their dreams and start living them instead!”

- **Randy B.**

“ Since I joined GIN in January of 2011 and have been on the website, GIN has empowered me mentally, emotionally and physically. And the empowerment just keeps on growing. When it comes to GIN, I'm home.”

- **Greg K.**

“ I joined The Global Information Network only because of my interest in information 'unknown from the majority.' After listening through maybe the first couple of audios, I was drawn in permanently. Everything I listened to shed so much light on many things I had been pondering and things I had not even begun to think. Without this knowledge, who knows how much time would have lapsed without reaching a better understanding of these principals. This information, this organization, is an absolute must for those who appreciate knowledge, and wish to raise their practice to a much larger plateau.”

- **Alexander**

“ I have started dreaming again and instead of looking forward to a more passive retirement stage at age 65, I look forward now for a more active and challenging lifestyle in the succeeding years. Watch out for some miracles to happen.”

- **Magnolito C.**
